## Workshop Table of Contents

1. Fluid Flow and Heat Transfer in a Mixing Tee  |  WS1-1
2. Transonic Flow over a NACA0012 Airfoil     |  WS2-1
3. Modeling Multi-Species Flow                |  WS3-1
4. Electronics Cooling with Natural Convection and Radiation | WS4-1
5. Using Moving Reference Frames and Sliding Meshes | WS5-1
6. Using the Discrete Phase Model (DPM)       |  WS6-1
7. Tank Flushing Example                      |  WS7-1
