

Positions Available
Biomedical Engineering Laboratory
University of Oklahoma

Research Technician or Postdoctoral Research Associate

Organization: Biomedical Engineering Laboratory / School of AME / University of Oklahoma

Location: Norman, Oklahoma, United States

Date Needed: Available immediately

Primary Category: Research staff member for animal (chinchilla) studies

Type of Position: Full-Time

Salary: To be comparable and determined

Description & Details:

The University of Oklahoma has a 2-year with possible 2-year extension Research Technician or Postdoctoral Research Associate position available in Dr. Rong Gan's Biomedical Engineering Lab to conduct experimental measurements of acoustic-mechanical transmission through the ear in animal model of chinchilla. Of particular interest are candidates who have relevant animal research experience and education (Master's or PhD level).

Dr. Gan's Biomedical Engineering (BME) Lab is in the Stephenson Research and Technology Center on the University Research Campus adjacent to the University of Oklahoma's main campus in Norman, Oklahoma. The BME lab is equipped with advanced facilities to conduct research in auditory testing, material property measuring, and computational modeling. The candidates also will have access to core facilities on the Norman campus and the OU Health Sciences Center (Medical School) in Oklahoma City, Oklahoma.

Interested individuals should contact Dr. Yijie Jiang (Yijie.jiang@ou.edu) for an interview at the ARO 2024 meeting or send a curriculum vitae and the names and contact information for three references to Dr. Rong Gan (rgan@ou.edu), School of Aerospace and Mechanical Engineering, University of Oklahoma. The University of Oklahoma is an EEO/AA Employer.
