

**Professor in Computational Mechanical and Materials Engineering  
Harvard University  
School of Engineering and Applied Sciences**

The Harvard School of Engineering and Applied Sciences (HSEAS) seeks applicants for an appointment at the level of tenured professor in the field of computational mechanical and materials engineering. The ideal candidate will have high expertise in computation, and will also have a demonstrated commitment to significant and innovative applications in mechanical engineering and/or materials engineering.

Successful candidates will have enthusiasm for teaching both graduate and undergraduate courses in engineering and applied computational science, and work with HSEAS faculty to develop a curriculum for our ABET-accredited engineering program.

Applicants should send a cover letter, CV, a statement of teaching interests, a statement of research plans, copies of three publications, and names and contact information for at least three references. These documents should be submitted as a single pdf attachment to [CompuMcMat@seas.harvard.edu](mailto:CompuMcMat@seas.harvard.edu).

We encourage applications before **15 March 2011**, but will continue to review new applications until the position is filled. Harvard University is an Equal Opportunity/Affirmative Action employer and applications from women and underrepresented minority candidates are strongly encouraged.
