

Fully Funded Phd Position Available in Michigan Technological University

Phd Student Assistantship Available in the domain of Mechanics, Modeling and Materials in Michigan Technological University, Starting January, 2021.

Immediate funding for a Phd student in the Department of Mechanical Engg., at Michigan Tech (<https://www.mtu.edu/mechanical/>) is available under the supervision of Dr. Trisha Sain. Our research website can be found here (<https://sites.google.com/a/mtu.edu/trisha-sain/>).

The candidate is anticipated to work on computational model development for composites, subjected to environmental degradation and performing experiments to determine changes in the material's microstructure. Candidates with MS in Engineering and with exposure in computational mechanics/multiscale modeling is preferred. Familiarity on coding languages would be helpful. Interested candidates may contact via email to : tsain_at_mtu_dot_edu at the earliest.
