

MACE-11010 Engineering Mechanics Survey

Use this survey to collect feedbacks on examination system of the course MACE-11010 Engineering Mechanics.

1. Fill in your information, including your name, e-mail, university ID, and your course.
2. The questions focus on the examination system of the course.
3. Students answer the questions in the class (Friday, 28 Sept).

Course Lecturer: Dr. Henry Tan
28th Sep 2007

Name			University ID	
Email				
Course				
	Yes	No	Why you make this decision?	
Do you agree with the traditional examination system, with the final exam (weight 70%) and two course assignment (weight 20%) at the end of the semester? Note that another 10% comes from lab.				
Do you agree with the currently proposed new examination system, which is based on online activities (weight 90%) and no final exams at the end of the term, plus another 10% comes from lab?				
Do you agree with a new examination system, which is one final exam at the end of term (weight 50%), and online activities (weight 40%), plus another 10% comes from lab?				
Any other idea?
