

The MIT Department of Mechanical Engineering (MechE) seeks candidates for faculty positions starting July 1, 2024 or on a mutually agreed date thereafter.

We seek candidates who will provide excellence and leadership in research, innovate in undergraduate and graduate education, and contribute to the diversity and growth of the MechE community at MIT.

Candidates in all areas related to Mechanical Engineering will be considered, including, but not limited to: (1) mechanics: modeling, experimentation and computation; (2) design, manufacturing, and product development; (3) control, instrumentation, and robotics; (4) energy science and engineering; (5) ocean science and engineering; (6) bioengineering; and (7) micro/nanoengineering. Research in cross-cutting topics, including artificial intelligence and data science related to core areas of MechE is also of interest.

The search is for candidates to be hired at the assistant professor level; however, under special circumstances an untenured associate professor or senior faculty appointment is possible, commensurate with experience. Women, underrepresented minorities, protected veterans, and individuals with disabilities are especially encouraged to apply.
