

SCHOLARSHIPS FOR MASTER STUDIES

Master in Interacting Complex Systems (MSCI)

You are a French or a foreign student and you want to follow a course of excellence in France and benefit from the advantages of the center of excellence at UTC?

Get a grant to follow the Master program in Interacting Complex Systems (MSCI) of the Labex MS2T (Control of Technological Systems of Systems).

In the framework of the Labex MS2T, UTC provides scholarships for students with high academic records who apply to one of the **three specialties** of its master program:

- Information Technology for Autonomous Systems in cooperation
- Biomechanics and Bioengineering
- Mechatronic Systems and Advanced Mechanics

UTC delivers a national master's degree fully accredited by the French Ministry of Higher Education. As a master student of the MSCI program, you will be in contact with the best experts in this field, i.e. teachers, researchers and professionals, who provide a high quality and multidisciplinary education.

TERMS

These grants relate to **the Master level 2**. With a value of **800 Euros per month**, they are granted according to your academic results, and are awarded for a 10-month scholarship period, which covers the theoretical part of the curriculum and the graduation project (internship).

Applicants selected by the Master selection committee will receive an application form to obtain the scholarship.

Do not hesitate to apply!
