

## Where creativity meets innovation

Our client BBR VT International Ltd and the BBR Network are recognized as the leading group of specialized engineering contractors in the field of post-tensioning, stay cable and related construction engineering in over 50 countries. For more than 60 years, BBR technologies have been successfully applied to a vast variety of infrastructure projects – such as bridges, buildings, tanks, silos, dams, marine structures, towers, tunnels, water reservoirs, arenas and wind farms. The BBR Network reaches out around the globe and has at its disposal more than 2,000 engineers and professionals, as well as the latest internationally recognized technology.

For the technical headquarters based in Scherzenbach-Zurich, Switzerland, we are looking for a seasoned

## Project Leader R&D (f/m)

**Your responsibility** | As a senior R&D professional you lead internal and external research and product development projects. In this key position you will directly report to the Head of Technology. You design, specify and engineer construction products and conduct small to large scale tests in international laboratories. During all project phases you draft precise documentation for technical approvals, for conferences and journal publications.

You are in permanent contact with universities, consultants, approval bodies, and act proactively in international technical commissions, so as to set new standards internally as well as for the worldwide construction industry. English is the working language for all technical documentation and reports.

**Your personality** | To successfully meet this challenge, you have a MSc or a PhD in civil engineering, mechanical engineering, structural engineering or material science. You will bring at least three years of international experience in engineering design or R&D. A proven track record in finite element analysis, and being familiar with Eurocode, fib (International Federation for Structural Concrete) or PTI would be highly valued. Proficiency in English and talent to formulate and write technical documentations, articles and presentations are mandatory.

You are a communicative team player and used to work in an international environment, with readiness to travel occasionally (10%-20%).

**Your perspectives** | In a stimulating, but demanding working environment, BBR VT International Ltd provides you with an extremely interesting, challenging job, that is offering adequate room for the development of own ideas and initiatives. Flat hierarchy, open and transparent communication are part of the modern company culture. Room for promotion is available in this dynamic international environment with solid growth potential. Seize this unique opportunity to make your next career move.

If you can identify yourself with the requirements of this challenging position, we kindly ask you to send us your application and CV indicating the reference 695852 – preferably by email and with photo. For further information please contact Mister Mathias A. Piller.
